

ECONOMICS STATISTICS OF SHIPPING

January – June 2013

1. This report on the Economic Statistics of Shipping for the first six months of 2013 (January - June) is the Forty six monthly report published by the Samoa Bureau of Statistics. Data were collected mainly from Shipping Statistic Forms and cargo manifests, which were completed by Shipping agents and Stevedores as a port requirement for every international sea going vessel. This report excludes all domestic services and the Apia-Pago Pago route. Furthermore, if a vessel calls in more than once, its subsequent calls are recorded as a separate vessel.
2. From January –June of 2013, a total of one hundred and twenty nine (129) sea going vessels were cleared at the port of Apia. Forty eight (48) vessels were excluded from the tabulation because they do not have the required information. These vessels include Research/ Naval, Yacht, Cruise Ships and Fishing Vessels. The eighty one (81) international sea going vessels accepted for tabulation consisted of thirty nine (39) Container Vessels, ten (10) Mineral Oil Tankers, nine (9) Roll On/ Roll Off Vessels and twenty three (23) General Cargo Vessels.
3. Fig.1 below indicates the number of vessels by type and their respective percentages.

Fig.1

<i>Type of Vessel</i>	Container Vessels	Mineral Oil Tanker	Roll on/ Roll off	General Cargo Vessels	<i>Total</i>
Number of Vessels	39	10	9	23	81
Percentage	48.1	12.4	11.1	28.4	100

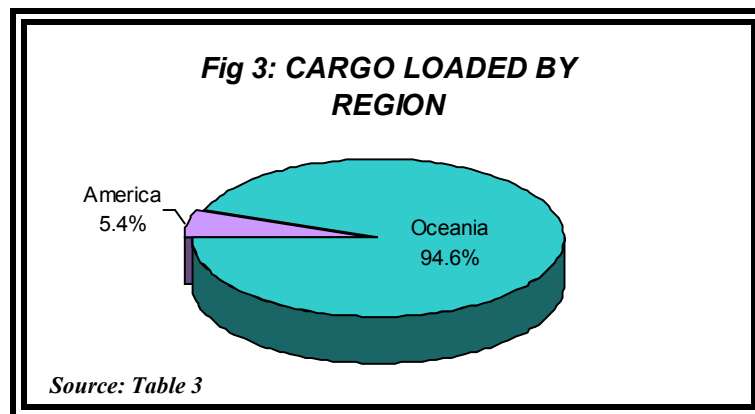

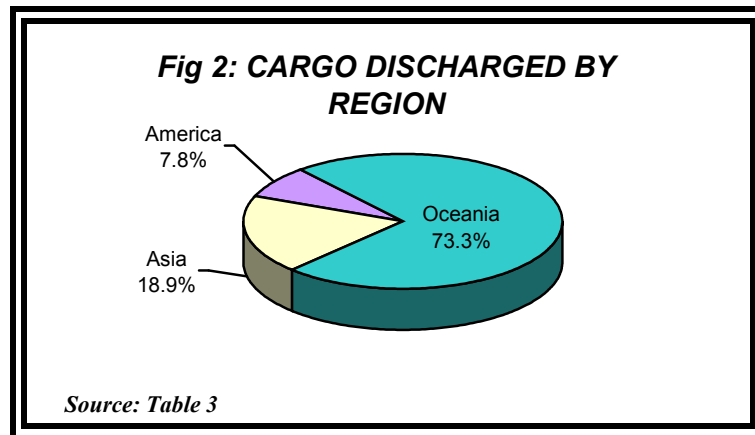

Source: Tables 1 and 2.

4. The analysis of cargo discharged at the port of Apia indicated that, 72^(a) vessels discharged a combined total of 109,092 metric tonnes of cargo, of which 73.3 percent from the Oceanic region (mostly from New Zealand and Solomon Island), 18.9 percent came from Asia (mostly from Singapore), and 7.8 percent from the American region (all from USA).
5. Forty eight (48)^(b) vessels loaded a combined total of 22,868 metric tonnes of cargo, of which 94.6 percent were loaded for the Oceanic region (mostly to New Zealand and Tonga) and the remaining 5.4 percent to the American region (all to the USA).

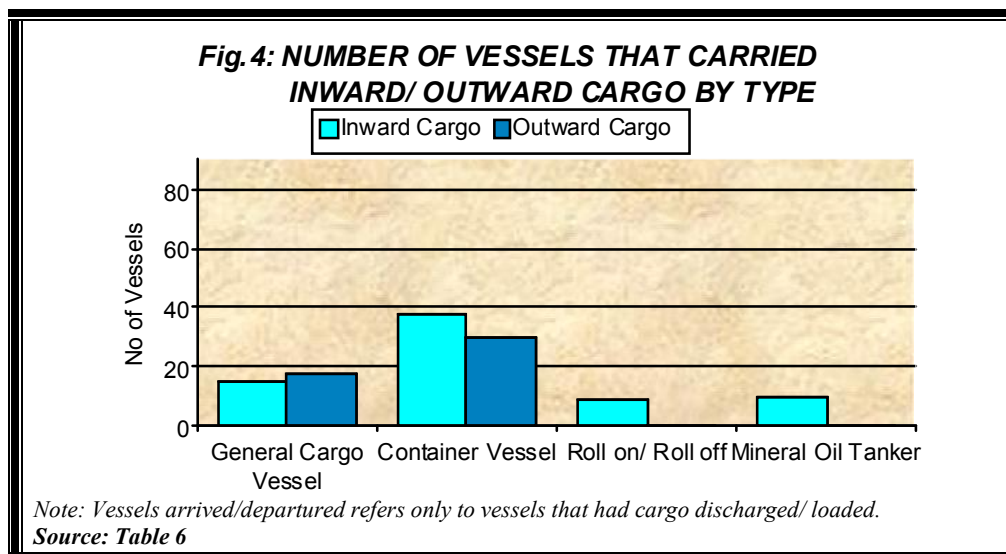

(a) : refers to vessels that only had inward cargo

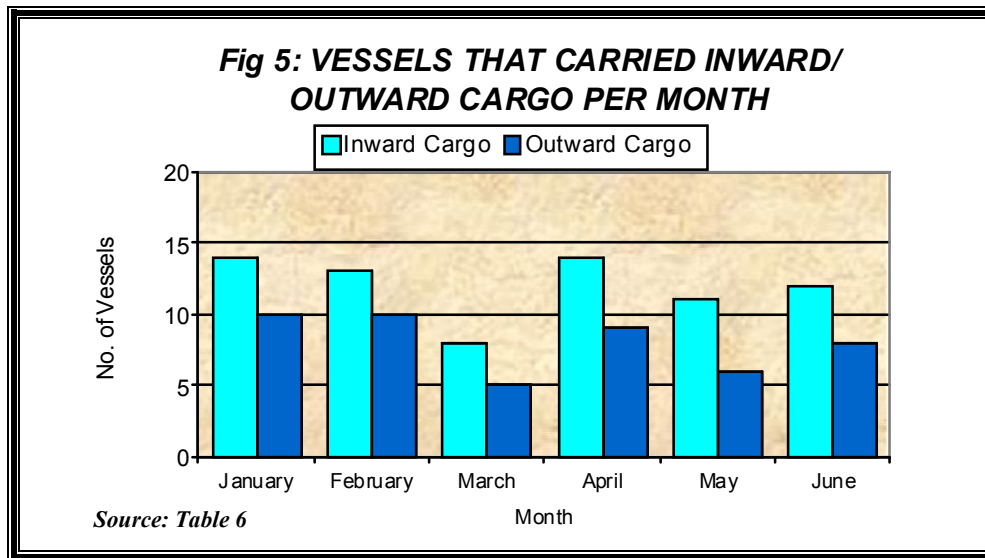

(b) : refers to vessels that only had outward cargo

6. Figures 2 and 3 portray a graphical comparison of cargo discharged and loaded respectively at the port of Apia by region.

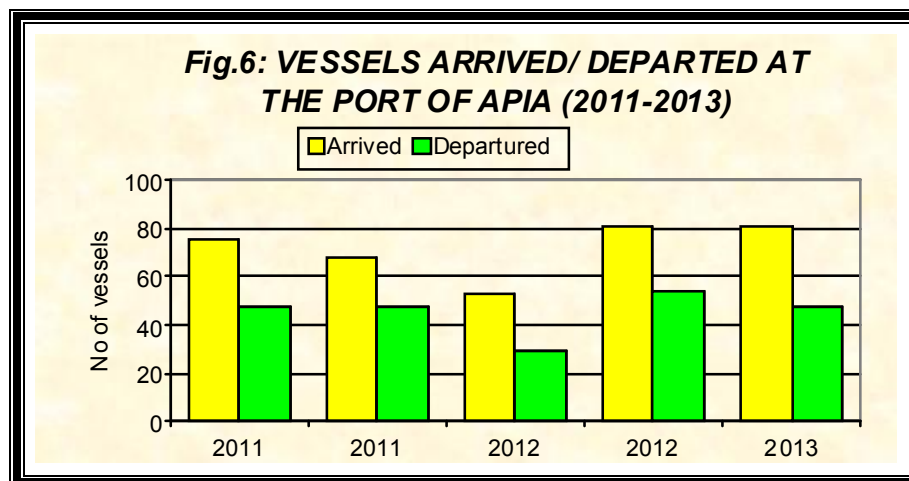

7. Of the seventy two (72) vessels that brought inward cargo, only forty eight (48) vessels returned with outward cargo of which thirty (30) were Container Vessels, eighteen(18) General Cargo Vessels. No Roll on/Roll off vessels and Mineral Oil Tankers returned with any outward cargo from the port of Apia.

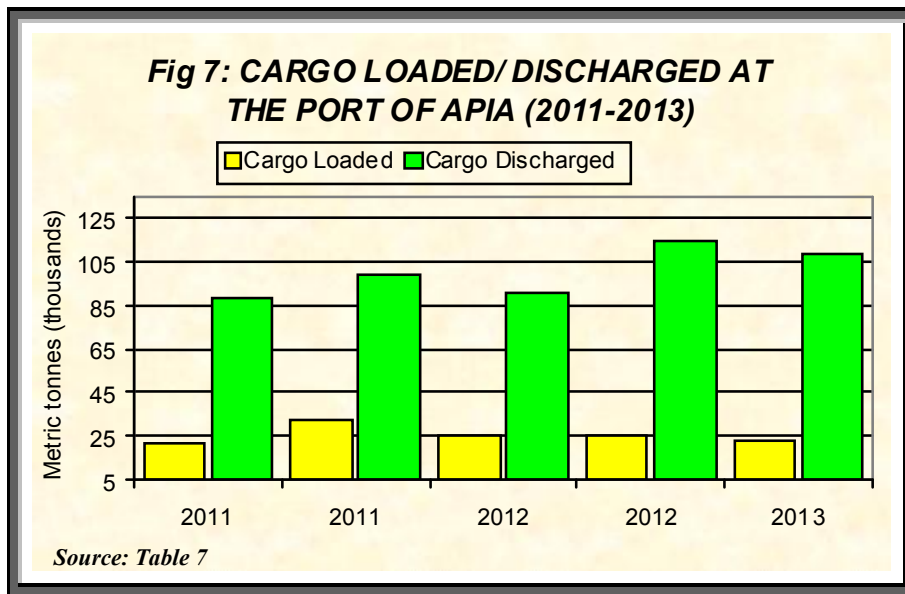

8. Fig 4 and 5 illustrates the graphical analysis of the number of vessels that carried inward/ outward cargo by type and month over the reference period.
9. A comparative analysis of six month shipping reports in the last two years (2011-2013) revealed that, the total number of vessels arrived ^(c) ranged from 53 to 81 while vessels departed ^(d) ranged from 29 to 54 and this is depicted in Fig 6. On the other hand, cargo discharged ranged from 88,586 to 114,710 metric tonnes while cargo loaded ranged from 22,016 to 32,777 metric tonnes. This is graphically illustrated in Fig 7.

(c) : refers to vessels that had the required information

(d) : refers to vessels that only had outward cargo

10. The attached tables 1-7 provides the reader with a more detailed analysis of international sea going vessels, and cargo loaded and discharged at the port of Apia within the reference period.
11. I would like to express my sincere gratitude and appreciation to all shipping agents, Stevedores and various government departments for their continuous support and cooperation, without which this report would not have been possible.

PLT

Tapua'i Laupu'a Fiti
Acting Government Statistician
