

Percentage distribution of school enrolment by single ages 5 - 24

From the Census of Population and Housing 2011, a total of 79,708 children in the age of 5-24 was recorded. About 71 percent or 56,788 students were attending school, of which 51 percent were males (28,719) and 49 percent were females (28,069). For students between 6-14 years old, more than 90 percent of the total attended primary school. For the 15-19 year old, a notable decreasing trend from 85% down to 40% was recorded as the students aged from 15-19 years. It indicated, as students moved up in secondary schools, many students started to drop out of school.
