

Government Finance Statistics Report

March Quarter 2024

Published: 31st May 2024

Highlights:

- The Net Lending/ Borrowing balance was a surplus of \$37.9 million.
- The Net Operating Balance was a surplus of \$39.4 million in March 2024 quarter.
- Total revenue aggregated to \$250.3 million
- Operating expenses increased by \$22.7 million from March 2023
- Net acquisition of NFA's recorded a total of \$1.5 million in March 2024.
- Total outstanding debt decreased by \$47.4 million compared to March 2023.

Overview

The Central Budgetary Government's operations concluded the third quarter of fiscal year 2023/24 with a \$37.9 million surplus in the Net Lending/Borrowing Balance (NLB). Despite being positive, the NLB decreased significantly from the previous quarter by \$33.5 million (47.0 percent). The decrease in the NLB was driven by a \$9.7 million fall in revenue collection during the period, together with the rise in government spending of \$23.8 million during the reviewed quarter.

The Net Operating Balance also showed a \$39.4 million surplus in the March 2024 quarter. The results were significant since they represented a big decline of \$32.9 million (45.5 percent) from the previous quarter. The outturn was primarily driven by a \$23.1 million rise in government spending (excluding the acquisition of fixed assets) from December 2023, as shown in chart 1 below.

Chart 1: Net Lending/ Net Borrowing and Net Operating Balance

REVENUE

Total receipts for the third quarter amounted to \$250.3 million. This included \$179.3 million from taxes, which made up 72.0 percent of the total government revenue; \$49.8 million from grants, accounting for 20.0 percent of the total; and \$21.2 million from other revenues. The revenue collected in March 2024 was \$9.7 million less than in December 2023, but \$26.8 million higher than the comparable quarter in March 2023.

Taxes

Total tax revenue for the March 2024 quarter amounted to \$179.3 million. The largest contribution came from taxes on goods and services, including general taxes on products and services, excise taxes, and taxes on specialized services, totalling \$114.7 million. Of this, \$73.7 million, or 64.2 percent, was collected through general taxes on goods and services, also known as the VAGST. Compared to March 2023, VAGST revenue increased by \$5.8 million but was \$11.8 million less than the previous quarter's figure. Additionally, the government collected \$39.1 million from excise taxes in March 2024, which accounted for 21.8 percent of the total tax revenue but was \$15.9 million lower than in December 2023. Income, profit, and capital gains taxes amounted to \$45.3 million in March 2024, reflecting increases of \$2.5 million from December and \$7.7 million from March 2023. Overall, total taxes collected were \$34.2 million less than in December 2023 but \$12.3 million higher compared to the same quarter in 2023.

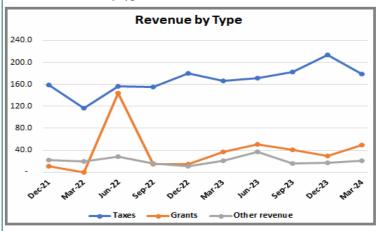

Grants

The total amount of grants recorded during the period amounted to \$49.8 million, representing a significant increase of \$20.7 million from the December quarter and \$13.4 million over the period of March 2023.

Other Revenue

Other revenue receipts amounted to \$21.2 million, which included \$10.8 million from property income, \$10.3 million from the sale of goods and services, and \$0.1 million from fines, penalties, and forfeits. This total represents an increase of \$3.8 million from the December 2023 balance. The chart below illustrates the growth trends of these three revenue components over the past ten quarters.

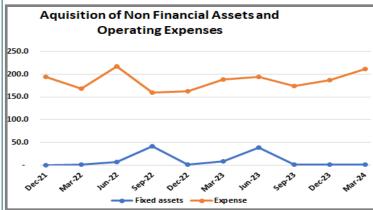

Chart 2: Revenue by type-Dec21-March 2024

EXPENDITURE

The Budgetary Central Government's total expenditure for the quarter was \$212.4 million, an increase of \$23.8 million from the second fiscal quarter. This included \$210.9 million in operational commitments and \$1.5 million in Net Acquisition of Fixed Assets. Operational expenses rose by \$23.1 million from the previous guarter and by \$22.7 million compared to the March 2023 quarter. The notable increase from December was primarily driven by a \$6.8 million rise in spending on goods and services, a \$2.4 million increase in interest payments, and a \$26.1 million increase in grants to other government units. These increases more than compensated for the \$13.1 million saved on employee compensation, subsidies, and social benefits. Additionally, \$1.5 million was spent on the Acquisition of Fixed Assets during the three months ending in March 2024. This small amount reflects delays in fund disbursement and economic development project implementation. The distribution of these expenditures is shown in the chart below.

Chart 3: Operating expenses and Acquisition of NFA's

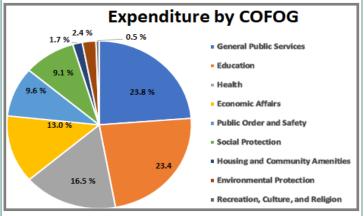

EXPENDITURE BY FUNCTIONS OF GOVERNMENT

In terms of sector-level spending, General Public Services received the largest share at \$50.5 million for the quarter, up \$10.8 million from December 2023 and \$6.4 million from March 2023. The education sector received \$49.7 million, representing 23.4 percent of over-

all COFOG. Health sector spending totaled \$35.1 million, a decrease of \$3.4 million from December. The agriculture sector saw a major spending increase of \$28.2 million from December 2023, bringing its total to \$32.8 million for the review period. Depict in the chart below is the composition of expenditure per function of Government for March 2024.

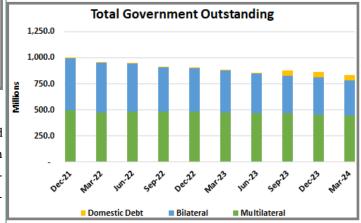

Chart 4: Expenditure by function March 2024

GOVERNMENT DEBT

The total government outstanding debt for the period was \$835.5 million. This comprised \$781.3 million in external loans and \$54.2 million owed to domestic banks. Loans to financial institutions totaled \$448.5 million, representing 57.4 percent of the external debt. The ADB and the World Bank were the largest creditors, with a combined total of \$429.2 million, while loans to the OPEC, European Investment Bank, and International Food Agricultural Development Organization amounted to \$19.3 million. Additionally, as of the end of March 2024, the total debt to the PRC Government and the Japanese Government (JICA) was \$332.8 million. Samoa's remaining balance with the PRC was \$278.2 million, a reduction of \$21.6 million from the December quarter. The amount owed to JICA also decreased by \$2.4 million from December 2023, leaving a remaining balance of \$59.3 million. Overall, total government debt, including domestic debt, decreased by \$47.4 million compared to the March 2023 quarter.

What are Government Finance Statistics?

Government Finance Statistics provide statistics that enable policymakers and analysts to study developments in the financial operations, financial position and liquidity situation of the government sector in a consistent and systematic manner. Balancing items have been created to provide summary information such as Net Operating Balance (NOB) and Net Lending (+) or Borrowing (-). The detailed data can also be used to examine specific areas of government operations, example: particular forms of taxation, level of expense and the amount of government borrowing etc. The harmonization of this system with other macroeconomic statistical systems like the System of National Accounts means that data from the GFS can be combined with data from NA to assess government performance in relation to the rest of the economy. Similarly, it can also be used for inter-country analysis of government operations, such as comparisons of ratios of taxes or expense to gross domestic product.

The Bureau is continuing with the work on refinements and improvements to the framework ensuring compliance with the latest GFSM 2014 published by the IMF. This also ensure that the latest information is incorporated in the system and reflected in the report.

This report provides the latest available information on the government financial operations and activities presented in tables attached and ordered as follows:

- Table 1: Statement of Operations: December 2021 March 2023
- Table 2: Revenue: December 2021 March 2024
- Table 3: Expense: December 2021 March 2024
